

## Normal Rabbit Serum

CatNo.:	ENK9010
Lot Number:	See Label
Size:	CatNo.: ENK9010-2; 2ml CatNo.: ENK9010-10; 10ml
Application:	Immunhistology – Frozen Immunhistology – Paraffin Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures.
Suggested Working Dilutio	For blocking purpose, use 2.5 – 5% (v/v) solution. <b>n</b>
General notes:	Normal rabbit serum can be used for blocking non-specific conserved sequence and/or Fc recep- tor binding. Typically, the serum used for blocking is from a different species than the species in which the primary antibody was raised. Often the blocking serum is from the species in which the second- ary antibody was raised.
Collection:	When searchers choose their serum, an important factor that should be taken into consideration is the source, which also emphasizes the traceability of the serum. Our system of vertical integration allows us to be certain of the origin and traceability of our serum. The serum is imported and treated in agreement with the European regulations. It is heat treated at 56°C for 30 minutes.
Protein Concentration: 53.8 mg/ml	
Preservative:	0.08% NaN <sub>3</sub>
Shipping:	Ship at room temperature.
Storage:	Store at 2-8°C for 12 month or at -20°C for longer.
Shelf Life:	12 months from date of dispatch.
Regulatory:	For in vitro research use only, not for diagnostic or therapeutic use.
Health and Safety Information:	

This product contains sodium azide  $(NaN_3)$ : a substance which should be handled by trained staff only.
