

Normal Rat Serum

CatNo.: ENR8000N-100

Lot Number: See Label

Size: CatNo.: ENR8000N-100; 100ml

Application: Immunhistology – Frozen
Immunhistology – Paraffin
Immunoassay

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures.

General notes: Normal rat serum can be used for blocking non-specific conserved sequence and/or Fc receptor binding.
Typically, the serum used for blocking is from a different species than the species in which the primary antibody was raised. Often the blocking serum is from the species in which the secondary antibody was raised.

Collection: When searchers choose their serum, an important factor that should be taken into consideration is the source, which also emphasizes the traceability of the serum. Our system of vertical integration allows us to be certain of the origin and traceability of our serum. The serum is imported and treated in agreement with the European regulations.

Protein Concentration: 60 mg/ml

Preservative: 0.09% NaN₃

Shipping: Ship at room temperature.

Storage: It is recommended to aliquot and store at -20°C on receipt.
When thawed, aliquot the sample as needed.
Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
Avoid repeated freezing and thawing as this may denature the product.

Shelf Life: 12 months from date of dispatch.

Regulatory: For **in vitro research** use only, not for diagnostic or therapeutic use.

Health and Safety Information:

This product contains sodium azide (NaN₃): a substance which should be handled by trained staff only.
